INTRODUCTION

United World Industries, Inc. (UWI), is an American Company specializing in imported boat accessories and metal components from Asian and Chinese sources. We are an equity partner with a consortium of Chinese factories that are among the world's lowest cost producers for imported iron castings, steel castings, die castings, cast iron, forgings, investment castings, and other metal components. Many of which have ISO 9002 certification. We control the production of customer specified metal components from tooling and samples until the final delivery of the finished products.*

In addition to our imported metal components, we offer a variety of other products from Chinese sources. We provide superior import management services for all of our imported products.

UWI is a specialist at sourcing your exporting need as well. There is great potential for developing businesses with China and the Pacific Rim. Our service includes complete import and export management!

If you are looking for boat accessories, metal components, and other products from reliable Chinese sources; if you want to expand your import or export business, please contact us at UWI.

* All of our products are a registered trademark of Blue Star™ which stands for the highest quality, customized designs, guaranteed service, the best value, and is the choice of boaters all around the world!
